

Project: Todo Application Test Plan	
Course: CSD 380	
Description: Functional Test Plan for the Todo Application	
Date: 9/3/2026	
Name: Ryan Barber	
Assignment: Module 4.2 Test plan	

Test 1	View Existing Todo Task Items			
	Test Objective: Verifies that users can view the existing list of Todo task items when the application loads.	Developer: Ryan Barber Date tested: 9/3/2026	Peer tester: Girma Dingeto Date tested: 9/05/2026	
Step	Action	Expected results:	Developer pass/fail	Tester pass/fail + Screenshot
1	Open a web browser	Browser opens successfully	Yes	Yes 
2	Navigate to the Todo application website	Todo application loads without errors	Yes	
3	Locate the Todo List section	Todo List section is visible on the page	Yes	Yes 
4	Review the listed Todo items	Existing Todo task items are displayed	Yes	Yes 
5	Refresh the browser page	Application reloads and the Todo List remains visible	Yes	Yes 

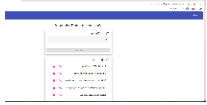

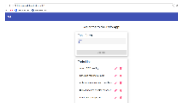

Test 2	Create a New Todo Task Item			
Comments	The Todo application successfully displays the existing task list when the website loads. The task items remain visible after refreshing the browser confirming that users can access and view the Todo List as required.			
	Test Objective: Verify that users can create and add a new Todo task item to the Todo List.	Developer: Ryan Barber Date tested: 9/3/2026	Peer tester: Cirna Dingeto Date tested: 9/05/2026	
Step	Action	Expected results:	Developer pass/fail	Tester pass/fail + Screenshot
1	Navigate to the Todo application website	Todo application successfully loads	Yes	Yes 
2	Click inside the Task input field	Task field becomes active and accepts input	Yes	Yes 
3	Enter 'Go to the Movies'	Entered text appears in the Task field	Yes	Yes 
4	Click Add Task	The task is submitted successfully	Yes	Yes 
5	Review the Todo List	'Go to the Movies' appears in the Todo List	Yes	Yes 
Comments	The Application allows the user to enter a new task and add it to the Todo List. The new task appears in the list after selecting Add Task, demonstrating that the crate-task functionality works correctly.			

Test 3	Edit an Existing Todo Task Item			
	Test Objective: Verify that users can edit an existing Todo task and save the updated information	Developer: Ryan Barber Date tested: 9/3/2026	Peer tester: Girma Dingeto Date tested:	
Step	Action	Expected results:	Developer pass/fail	Tester pass/fail + Screenshot
1	Locate 'Go to the Movies' in the Todo List.	The task is visible in the Todo List	Yes	Yes 
2	Click the pencil/edit icon next to the task	The Edit Form opens and displays the selected task	Yes	Yes 
3	Change the task to 'Cook dinner'	Updated text appears in the Edit Form	Yes	Yes 
4	Click Save	The updated task is saved successfully	Yes	Yes 
5	Review the Todo List	'Cook dinner' appears instead of the original task	Yes	Yes

				
Comments	The edit function allows an existing Todo item to be selected and edited. After saving the change, the Todo List displays the updated task information, confirming that task edits are processed correctly.			

Test 4	Delete an Existing Todo Item			
	Test Objective: Verify that users can delete an existing task from the Todo List	Developer: Ryan Barber Date tested: 9/3/2026	Peer tester: Girma Dingeto Date tested: 9/05/2026	
Step	Action	Expected results:	Developer pass/fail	Tester pass/fail + Screenshot
1	Locate 'Cook dinner'	The task is visible in the Todo List	Yes	Yes 
2	Click the trash/delete icon next to the task	The application processes the delete request	Yes	Yes 
3	Review the browser page	The deleted task no longer appears	Yes	Yes 
4	Refresh the browser page	The Todo application reloads successfully	Yes	Yes 

5	Review the Todo List again	The deleted task remains absent after refreshing	Yes	Yes 
Comments	The delete function successfully removes the selected task from the Todo List. After refreshing the application, the deleted item does not return, confirming that the task was removed successfully.			

Test 5	Prevent Submission of an Empty Todo Task			
	Test Objective: Verify that the application prevents users from creating a task without entering a Todo item	Developer: Ryan Barber Date tested: 9/3/2026	Peer tester: Date tested:	
Step	Action	Expected results:	Developer pass/fail	Tester pass/fail + Screenshot
1	Navigate to the Todo application website	Todo Application loads successfully	Yes	Yes 
2	Locate the Task input field	Task input field is visible	Yes	Yes 
3	Leave the Task input field empty	No text is present in the Task field	Yes	Yes 
4	Attempt to click Add Task	The application prevents an empty task from being submitted	Yes	Yes 
5	Review the Todo List	No blank task appears in the Todo List	Yes	Yes 
Comments	The applications prevent users from creating an empty Todo item when no task information has been entered. No blank entry appears in the Todo List, demonstrating that the input validation requirement functions correctly.
